-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-27 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-27 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. §§ 119 and 120

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. ____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
* See the attached detailed Office action for a list of the certified copies not received.
- 13) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application) since a specific reference was included in the first sentence of the specification or in an Application Data Sheet. 37 CFR 1.78.
a) ☐ The translation of the foreign language provisional application has been received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121 since a specific reference was included in the first sentence of the specification or in an Application Data Sheet. 37 CFR 1.78.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) ____.
- 4) ☐ Interview Summary (PTO-413) Paper No(s). ____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-7, 10, 11, 13, 17-22 and 26 are rejected under 35 U.S.C. 102(e) as being anticipated by Kim (U.S. Patent No. 6,505,040).

Regarding claim 1, Kim teaches storing a list of multiple parties (i.e., a predetermined group of subscribers) (col.1, lines 66, 67, col.2, lines 1-10, 47-51).

Kim further teaches contacting, when a telephone conference is requested for the multiple parties (i.e., predetermined group of subscribers) stored in the list, the parties taken from the stored list of parties for one of setting up and preparing for setting-up a telephone conference between the parties (col.2, lines 1-22, 47-51).

Regarding claims 2 and 17, Kim teaches the telephone conference is a mobile radio telephone conference in which the least one subscriber participates via a mobile radio network (abstract; col.2, lines 1-22, 47-56).

Regarding claims 3 and 18, Kim teaches requesting the telephone conference via a mobile radio telephone network (abstract; col.2, lines 1-22, 47-56).

Regarding claims 4 and 19, Kim teaches a telephone connection of at least one subscriber is set up to a telephone conference by the subscriber calling a telephone

Art Unit: 2645

number not associated with any other subscriber, whereupon, when the number is called, the telecommunication network connects subscribers to the telephone conference (col.2, lines 1-22, 47-56, col.3, lines 52-62).

Regarding claims 5 and 20, Kim teaches providing a limited number of mobile radio telephone numbers (IMSI) in at least one mobile radio telecommunication network, whereupon when the numbers are called by any mobile radio subscriber, a telephone conference is set up to this mobile radio subscriber (col.2, lines 1-22, 47-56, col.3, lines 52-62).

Regarding claims 6 and 21, Kim teaches after a telephone conference has been requested by a subscriber, sending a message via a device at the mobile radio network end to the subscribers who are contained in the list for which list a telephone conference has been requested, and taking one of telephone numbers and other telecommunication identities of the subscribers from a list stored in one of the mobile radio network and by the subscriber requesting the telephone conference (col.2, lines 1-22, 47-56, col.3, lines 52-62).

Regarding claims 7 and 22, Kim teaches preparing setting up of a telephone conference, sending an invitation to the telephone conference to subscribers who are stored in the list, whereupon an invited subscriber is only connected to the telephone conference if he accepts the invitation (abstract; col.2, lines 1-22, 47-56, col.3, lines 52-62).

Regarding claim 10, Kim teaches that the storing step includes storing, for the group, in each case a list of at least one of names, telephone numbers and other telecommunication addresses of only each subscriber in the group but no other subscriber

Art Unit: 2645

in at least one of the mobile terminal, a mobile radio subscriber identification card and the telecommunication network (abstract; col.2, lines 1-22, 47-56).

Regarding claims 11 and 26, Kim teaches admitting only subscribers who are stored in a list for a group to a telephone conference for this group (abstract; col.2, lines 1-22, 47-56).

Regarding claim 13, Kim teaches a mobile phone to conference mode (i.e., control device) operative so that, when a telephone conference is requested for a multiple parties (i.e., a predetermined group of subscribers) by a party of a telecommunication network, the control device contacts parties of the predetermined group of parties, which parties are stored in a list for this group, for one of setting up and preparing the setting-up of a telephone conference between the parties (col.1, lines 66, 67, col.2, lines 1-10, 47-51).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 8, 12, 14-16, 23 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kim (U.S. Patent No. 6,505,040) and in view of Wu (U.S. Patent No. 6,275,575).

Regarding claims 8 and 23, Kim fails to teach "transmitting the request one of as short message and as WML content to the terminal". Wu teaches transmitting the request

Art Unit: 2645

one of as short message and as WML content to the terminal (col.6, lines 10-16, col.7, lines 13-25). Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Kim to transmit the request one of as short message and as WML content to the terminal as taught by Wu. The motivation for the modification is to have doing so in order to provide a conventional means to deliver conference related text.

Regarding claims 12 and 27, Kim fails to teach “defining a list with regard to subscribers contained therein by at least one of mobile radio Internet (WAP) and landline network Internet”. Wu teaches defining a list with regard to subscribers contained therein by at least one of mobile radio Internet (WAP) and landline network Internet (col.6, lines 66, 67, col.7, lines 1-12). Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Kim to define a list with regard to subscribers contained therein by at least one of mobile radio Internet (WAP) and landline network Internet as taught by Wu. The motivation for the modification is to have doing so in order to facilitate intra-network communications.

Regarding claim 14, Kim fails to teach “the device is a server one of in a telecommunication network and having access to a telecommunications network”. Wu teaches that the device is a server one of in a telecommunication network and having access to a telecommunications network (abstract; col.6, lines 66, 67, col.7, lines 1-12). Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Kim to the device as a server one of in a telecommunication network and having access to a telecommunications network as

Art Unit: 2645

taught by Wu. The motivation for the modification is to have doing so in order to initiate a multiparty telephone conference.

Regarding claim 15, Kim fails to teach “the device includes an interface for receiving a request of a subscriber for setting up a telephone conference, a control device for setting up the telephone conference and an interface for connecting subscribers to one another as a telephone conference”. Wu teaches that the device includes an interface for receiving a request of a subscriber for setting up a telephone conference, a control device for setting up the telephone conference and an interface for connecting subscribers to one another as a telephone conference (col.6, lines 10-16, col.7, lines 13-25). Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Kim to have the device including an interface for receiving a request of a subscriber for setting up a telephone conference, a control device for setting up the telephone conference and an interface for connecting subscribers to one another as a telephone conference as taught by Wu. The motivation for the modification is to have doing so in order to provide a conventional means to deliver conference related text.

Regarding claim 16, Kim teaches after the setting-up of the telephone conference has been prepared, a voice telephone conference is inherently established (col.1, lines 66, 67, col.2, lines 1-10, 47-51).

5. Claims 9, 24 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kim (U.S. Patent No. 6,505,040) and in view of Bradshaw, Jr. (U.S. Patent No. 6,608,820).

Art Unit: 2645

Regarding claims 9 and 24, Kim fails to teach “controlling a telephone conference with an element at the mobile radio network end during the telephone conference with regard to at least one of termination of the conference, exclusion of a subscriber from the conference and addition of a further subscriber, not contained in the list, to the conference”. Wu teaches controlling a telephone conference with an element at the mobile radio network end during the telephone conference with regard to at least one of termination of the conference, exclusion of a subscriber from the conference and addition of a further subscriber, not contained in the list, to the conference (abstract; col.4, lines 17-36). Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Kim to control a telephone conference with an element at the mobile radio network end during the telephone conference with regard to at least one of termination of the conference, exclusion of a subscriber from the conference and addition of a further subscriber, not contained in the list, to the conference as taught by Wu. The motivation for the modification is to have doing so in order to make the required change to the number of participants in the conference.

Regarding claim 25, Kim teaches that for the group, in each case a list of at least one of names, telephone numbers and other telecommunication addresses of each subscriber of the group but no other subscribers is stored at least one of in the mobile terminal, in a mobile radio subscriber identification card and in a memory in the telecommunication network (abstract; col.2, lines 1-22, 47-56).

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alam Elahee whose telephone number is (703) 305-4822. The examiner can normally be reached on Mon to Fri from 9:00am to 5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeffrey Hofsass can be reached on (703)305-4717. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9314 for regular communications and (703) 872-9314 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-4750.
